### Article 95 BPR - Alcohols

The making available and use of biocidal products in the European Union is regulated under the Biocidal Products Regulation 528/2012 (BPR).

A consequence of this regulation (Art. 95) is that as of 1 September 2015, a biocidal product shall not be made available on the market unless either the substance supplier or the product supplier is included in the "list of active substances and suppliers" or "Article 95 List".

The approval at EU level of the alcohol substances Ethanol, 1-Propanol and 2-Propanol, as biocidal active substances according to the BPR, is supported by the Alcohol Task Force (ATF) members, which are listed on the "list of active substances and suppliers" as Participants.

<http://echa.europa.eu/information-on-chemicals/active-substance-suppliers>

In case the relevant alcohol supplier is not included on the "list of active substances and suppliers", the product supplier has the following options available:

- Convince the substance supplier to be listed;
- Apply to be listed itself as product supplier;
- Change supplier to one included on the list.

To submit an application for inclusion on the "list of active substances and suppliers" or "Article 95 List", the following options are provided by Art. 95 BPR in order to address the required data:

- a complete substance dossier for that relevant substance,
- a letter of access (LoA) to a complete substance dossier, or
- a reference to a complete substance dossier for which all data protection periods have expired.

The Alcohol Task Force offers a Letter of Access to the complete active substance dossier for Ethanol, 1-Propanol and 2-Propanol for inclusion on the "Article 95 List" (either as substance supplier or product supplier). In case of interest, please contact the Data Submitter of the ATF, Field Fisher Waterhouse, contact person: [Maud.Grunchard@fieldfisher.com](mailto:Maud.Grunchard@fieldfisher.com).

February 2015

Alcohol Task Force,
